Presentation Overview

- Who is the MAE Center?
- What is MAEviz?
- MAEviz Overview
- Architecture Overview
- Extending MAEviz
- Conclusions

Who is the MAE Center?

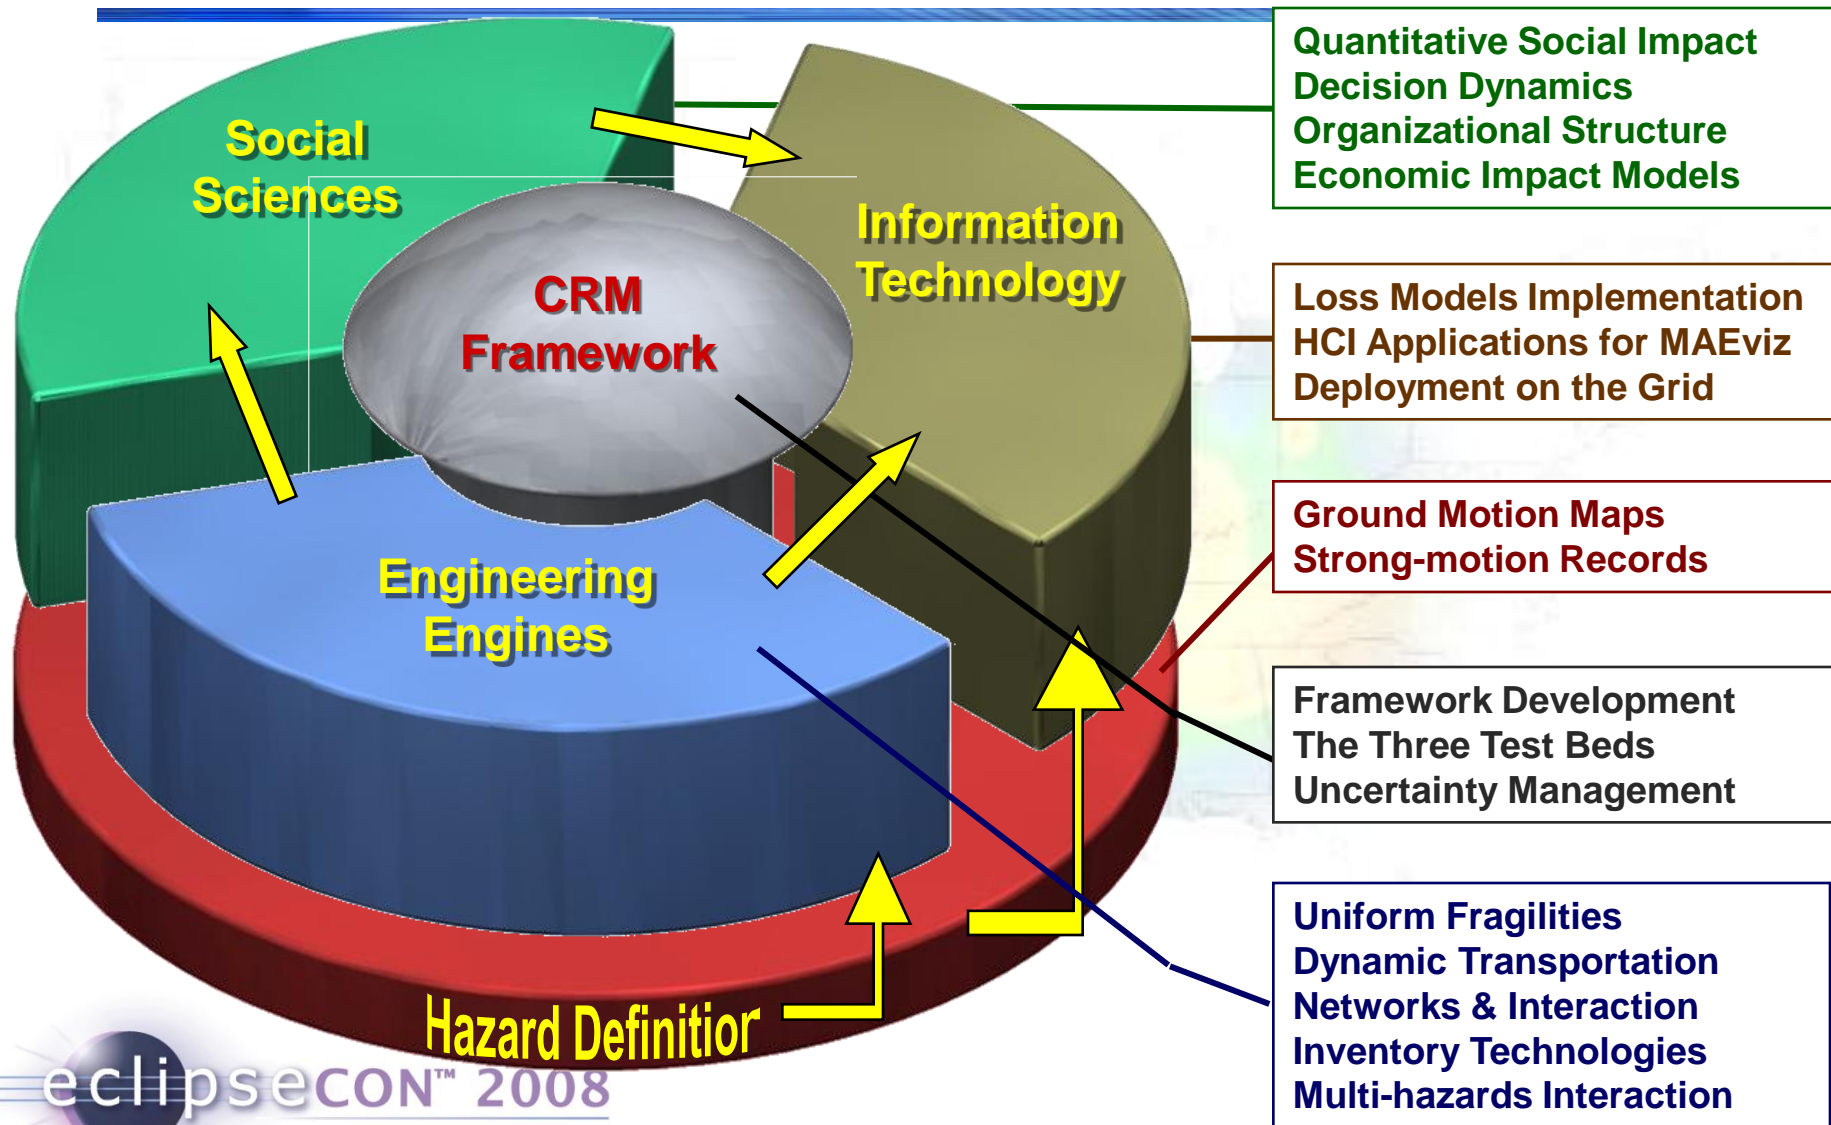

- Mid-America Earthquake Center is an NSF Sponsored Center to research new engineering approaches to minimize consequences of future earthquakes
- Primary science focus includes but not limited to Eastern and Central US

- MAE Center Developed the Consequence-based Risk Management Model

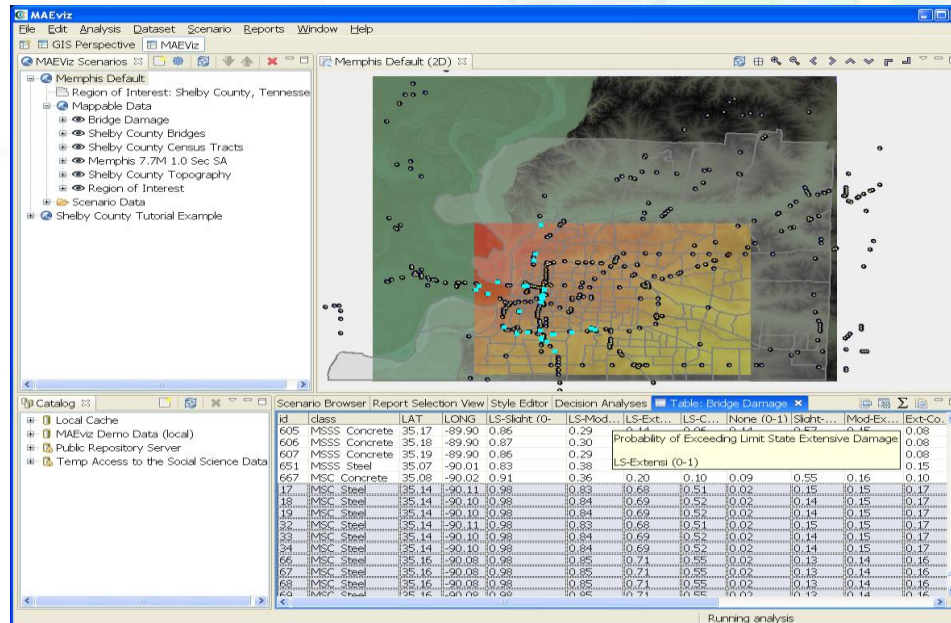

Integrated Loss Assessment and Reduction

What is MAEviz?

- MAEviz is an extensible network aware application and environment
- MAEviz **integrates** spatial information, data, and visual information to perform **seismic risk assessment and analysis.**

MAEviz Benefits

- Revolutionizes the practice of earthquake research and catastrophe event management
 - Connects researchers, scientists, engineers to practitioners and decision makers
 - Can be used to coordinate critical infrastructure planning and mitigation, response, and recovery
- Provides a mechanism to analyze “What if” scenarios
- Provides framework to add new data and algorithms or update existing data and algorithms
- MAEviz is Open Source

The MAEviz Model

- MAEviz Implements Consequence-Based Risk Management (CRM)

- Inputs - Hazards, Inventory, Fragility Models
- Output - Damage Prediction, Reporting, Decision Support

Hazard Definition

Inventory Selection

Fragility Models

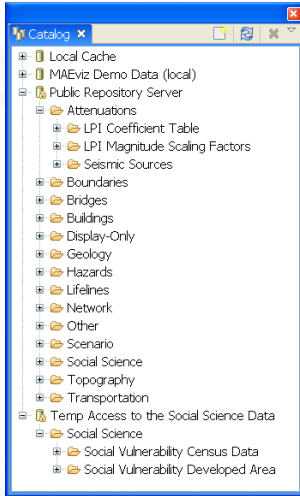

Damage Prediction

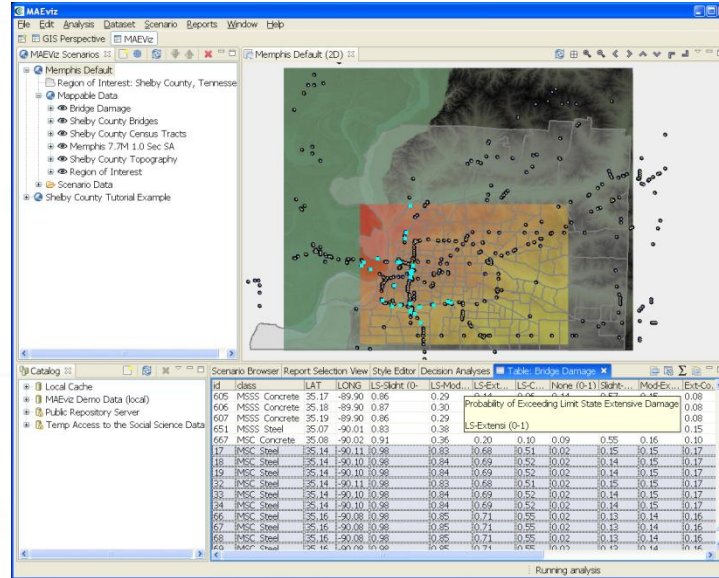

Decision Support

Damage Summary

ID	Material	LS-Mod.	LS-Ext.	LS-C.	None (0-1)	ShkE...	ModEx...	Ext.Co.
605	MSSC Concrete	35.17	-89.90	0.86	0.29			
606	MSSC Concrete	35.18	-89.90	0.87	0.30			
607	MSSC Concrete	35.19	-89.90	0.86	0.29			
651	MSSC Steel	35.07	-90.01	0.83	0.38			
667	MSC Concrete	35.08	-90.02	0.91	0.36	0.20	0.10	0.09

Synchronized Data Views

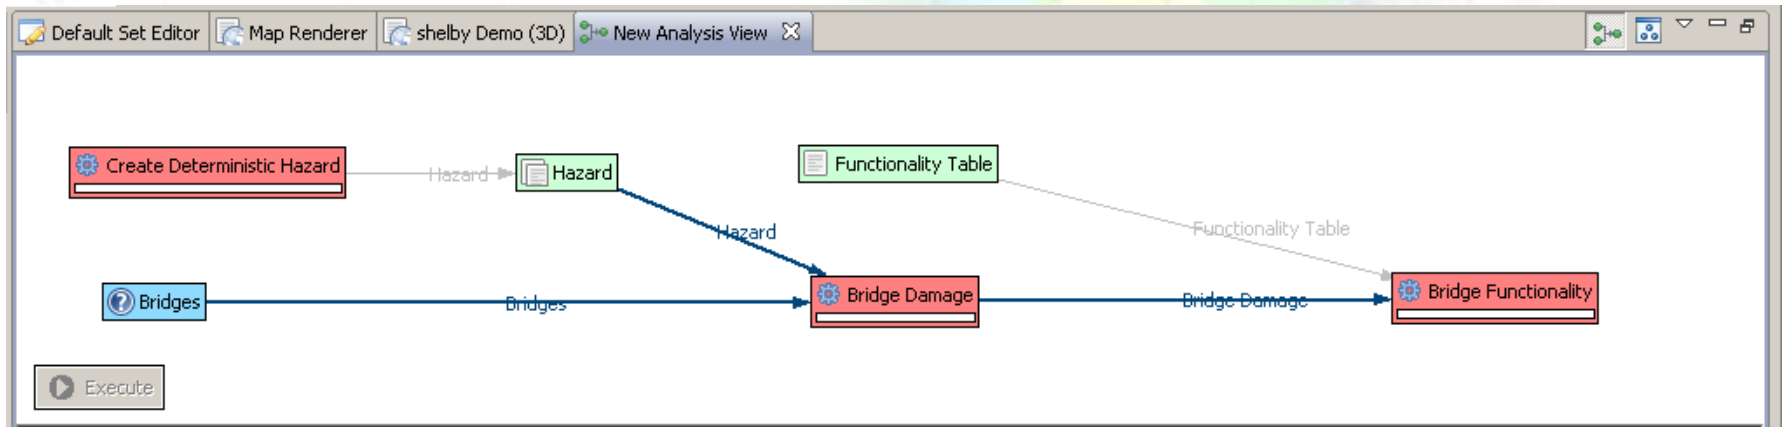

MAEviz Analyses

- +40 Analyses to-date
- Building:
 - Damage, Non-Structural
 - Damage, Economic Loss,
 - Liquefaction Damage
- Bridge:
 - Damage, Functionality, Repair
 - Cost Analysis
- Gas:
 - Network Damage
 - Repair Rate Analysis
- Hazard
 - Deterministic Earthquake
 - Probabilistic Earthquakes (USGS Maps)
- Network loss by using traffic modeling
- Decision support
- GIS
 - Overlay (i.e. intersect)
 - Aggregate by regions
- Social Impact Analysis

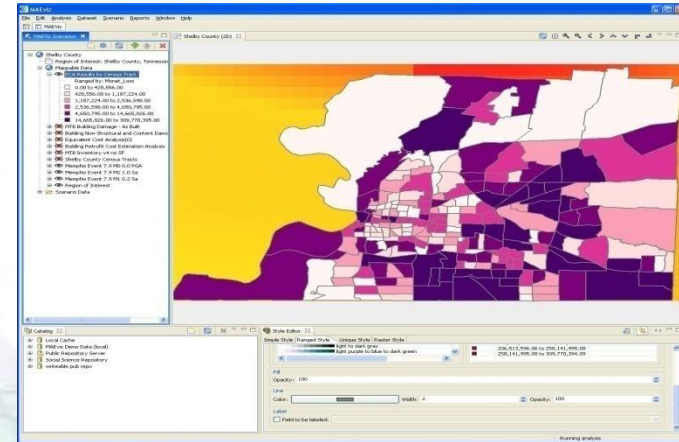

MAEviz - Analysis View

- Easier to understand the data flow and analysis dependency
- User-configurable analysis defaults
- Multiple analyses can run simultaneously
- Utilizes the Graphical Editor Framework (GEF)

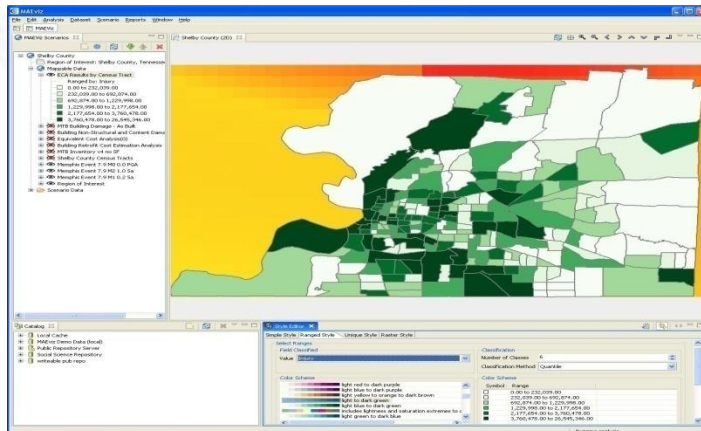

Decision Support - Data Aggregation

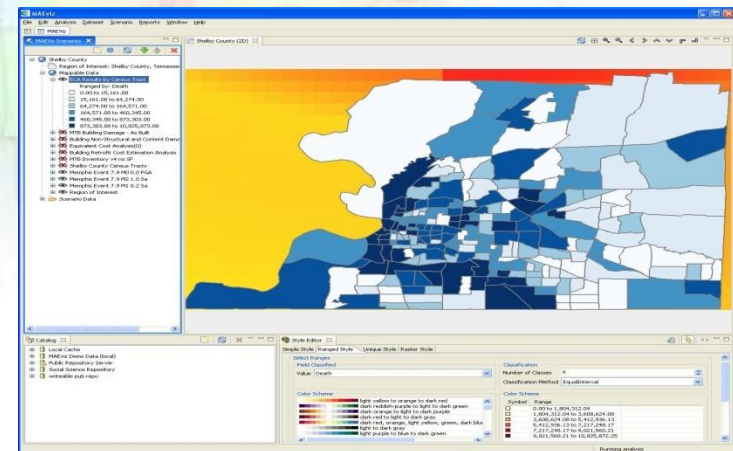

- Building Dataset
 - Memphis Building Inventory (w/out single family homes)
- Event
 - Magnitude 7.9 Earthquake at Blytheville, AR
- Analysis
 - Equivalent Cost Analysis
 - Death = \$5,000,000 per
 - Injury = \$1,500,000 per
 - Function loss = \$100,000 per sq. ft. per day

Monetary Loss by Census Tract

Deaths (\$) by Census Tract

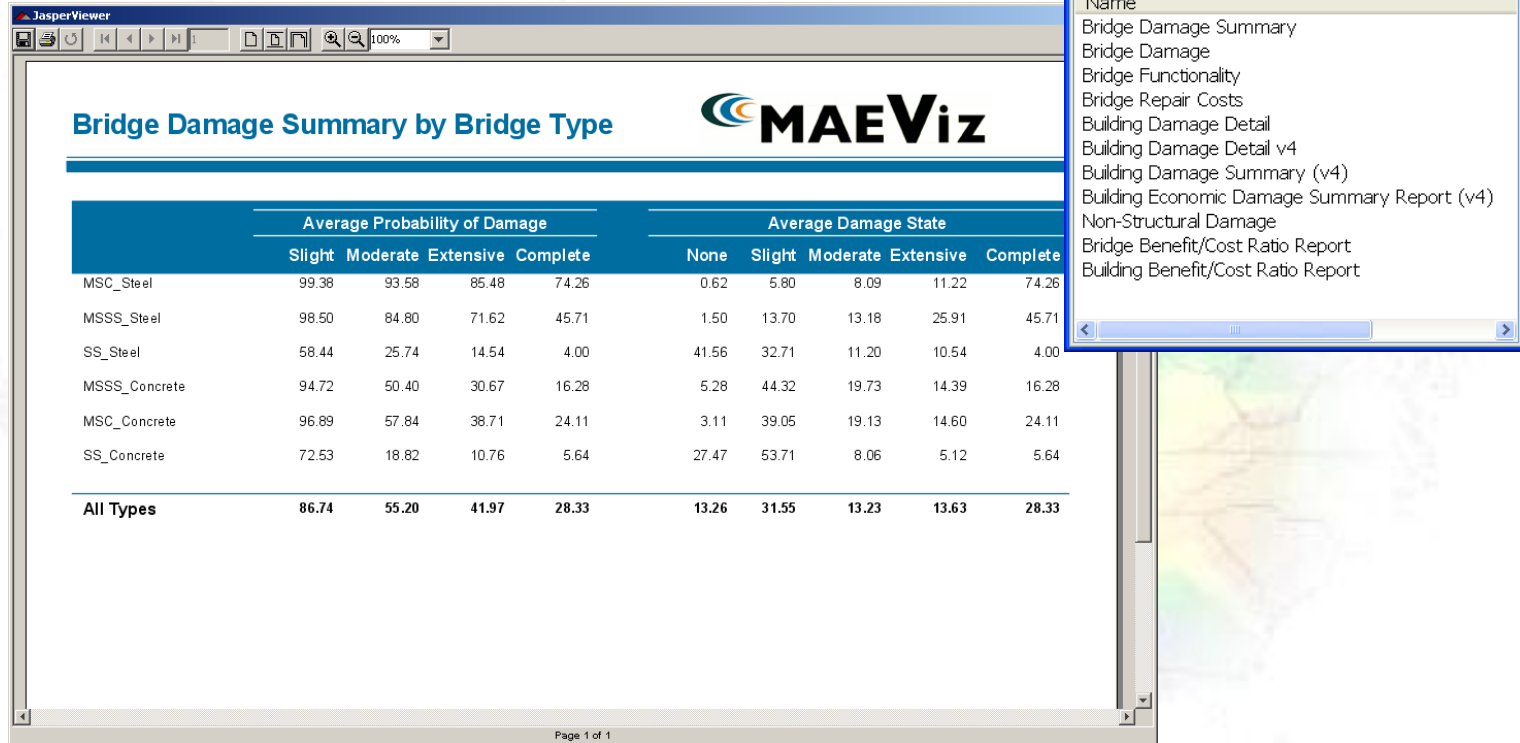

Injuries (\$) by Census Tract

MAEviz Reporting

- Multiple Report Types

The screenshot shows the JasperViewer application displaying a report titled "Bridge Damage Summary by Bridge Type" from MAEViz. The report includes a table with columns for Average Probability of Damage (Slight, Moderate, Extensive, Complete) and Average Damage State (None, Slight, Moderate, Extensive, Complete). A dialog box titled "Report Selection View" is open, listing various report types available for selection.

	Average Probability of Damage				Average Damage State				
	Slight	Moderate	Extensive	Complete	None	Slight	Moderate	Extensive	Complete
MSC_Steel	99.38	93.58	85.48	74.26	0.62	5.80	8.09	11.22	74.26
MSSS_Steel	98.50	84.80	71.62	45.71	1.50	13.70	13.18	25.91	45.71
SS_Steel	58.44	25.74	14.54	4.00	41.56	32.71	11.20	10.54	4.00
MSSS_Concrete	94.72	50.40	30.67	16.28	5.28	44.32	19.73	14.39	16.28
MSC_Concrete	96.89	57.84	38.71	24.11	3.11	39.05	19.13	14.60	24.11
SS_Concrete	72.53	18.82	10.76	5.64	27.47	53.71	8.06	5.12	5.64
All Types	86.74	55.20	41.97	28.33	13.26	31.55	13.23	13.63	28.33

Report Selection View

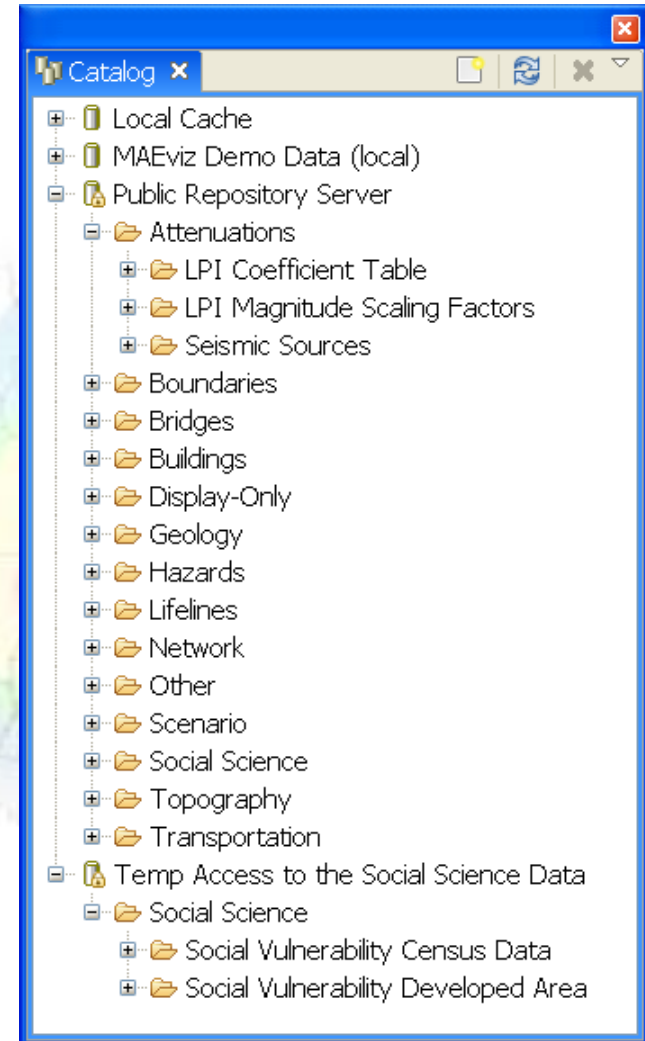

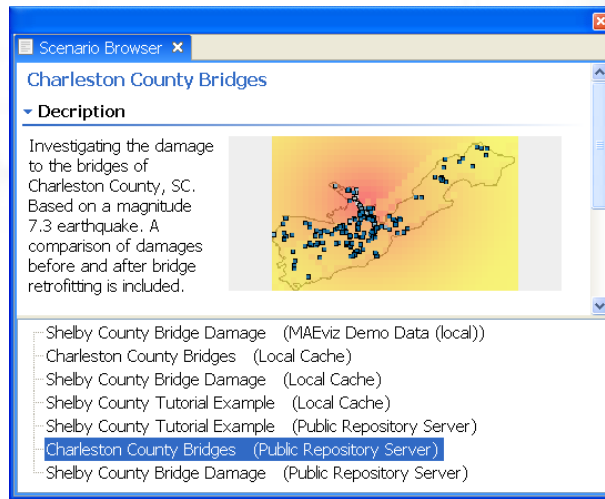

- Bridge Damage Summary
- Bridge Damage
- Bridge Functionality
- Bridge Repair Costs
- Building Damage Detail
- Building Damage Detail v4
- Building Damage Summary (v4)
- Building Economic Damage Summary Report (v4)
- Non-Structural Damage
- Bridge Benefit/Cost Ratio Report
- Building Benefit/Cost Ratio Report

- Currently using Jasper Reports
- Plan to move to BIRT

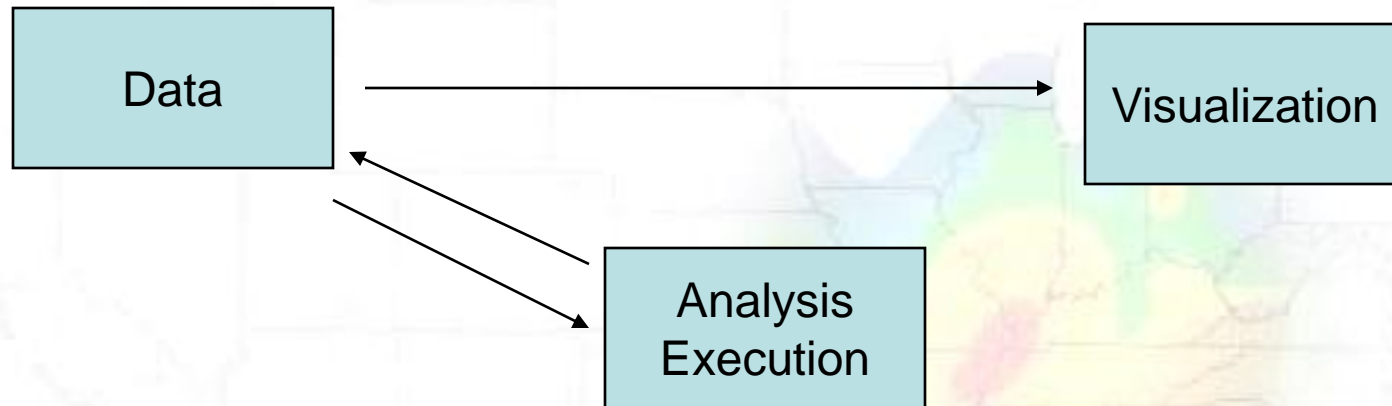

MAEviz – Extension & Plug-in Example

- Repository types are extensible
 - Supports local files systems and WAN
 - SAM WebDAV
 - PostGIS dB (v2.4)
 - Supports Quick Access to Saved Scenarios
- Extensible data types
 - Bridges, buildings, pipelines, etc.

The Inner Workings

- MAEviz primary goal is to analyze and visualize independent data sources

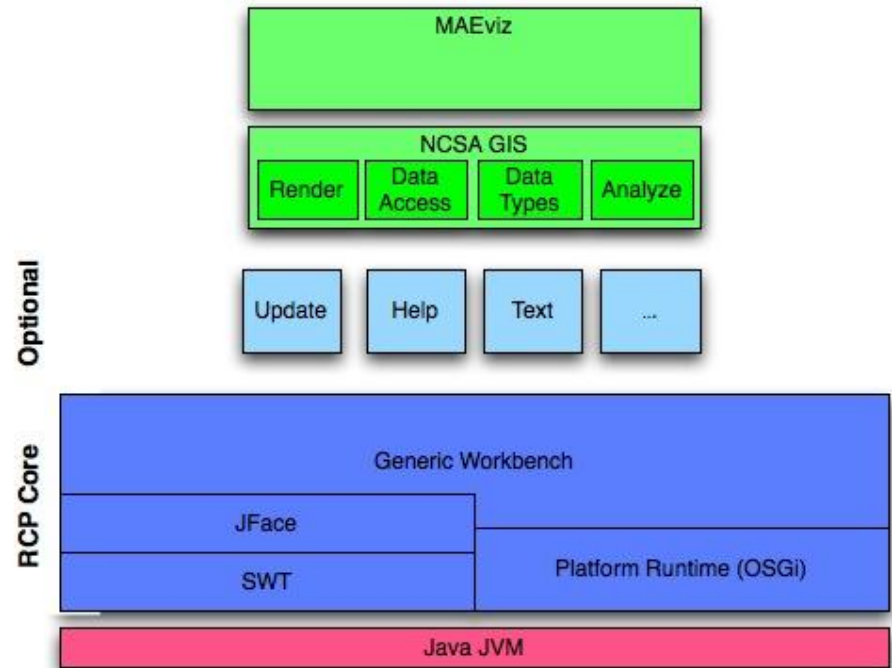

- MAEviz Application is made from Eclipse RCP, NCSA GIS Baseline, MAEviz plug-ins

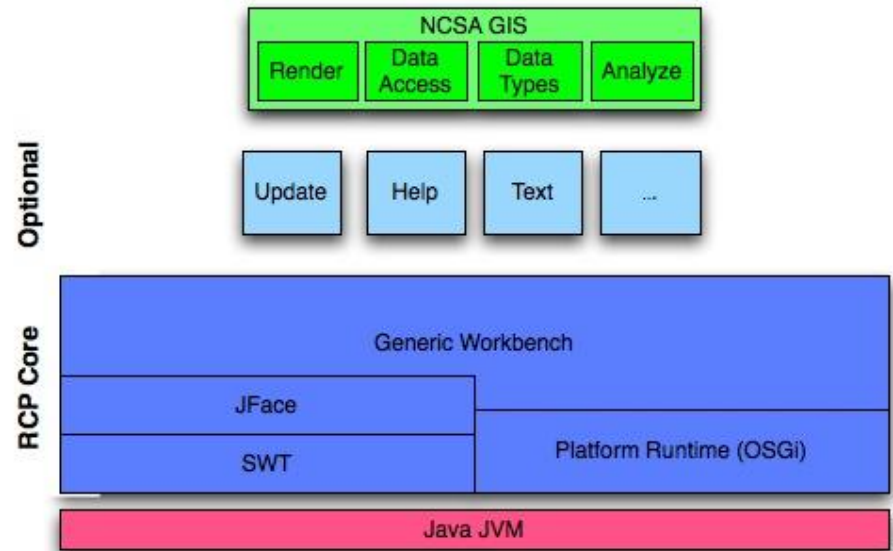

MAEviz - An NCSA GIS Application

- Features and capabilities driven by the MAE Center to support earthquake engineering
- Extensions to NCSA GIS and RCP all provided by plug-ins.
- Common extensions include:
 - Data Types
 - Hazards
 - Buildings
 - Bridges
 - Pipelines
 - Analyses
 - Bridge Damage
 - Displacement
 - Traffic Modeling
- MAE Center branding

NCSA GIS - A Rich Client Application

- Base Application with Three Main Functions
 - Data Management
 - Typing
 - Ingestion
 - Access
 - Provenance Tracking
 - Visualization
 - Support for 2D and 3D views
 - Zoom
 - Selection
 - Highlighting
 - Analysis Execution
 - Support for local multithreaded execution
 - (Support for remote execution forthcoming)
 - Visual dataflow system in development

Extending MAEviz - Other Options

- MAEviz currently supports around 20 extension points
- Common Extension Points:
 - Countries
 - Units
 - Unit conversions
 - Dataset factories
 - Metadata types
 - Visualization renderers
 - Repository Types
 - Base geometries
 - Analysis parameter types
 - Data store mappings
 - GIS Schemas
 - Location factories
 - Metadata location
 - Etc.

Conclusion

- RCP made it possible to make MAEviz modular and extensible and can support other analyses and hazard types (water, wind, etc.)
- MAEviz is a next-generation collaborative environment to link research and engineering to decision makers
- MAEviz represents new era of analysis and risk assessment
- Continued open source development will only improve the capabilities available to the community
- Contributing scientists and developers are welcome to join the effort
