Nano cluster
System Description

Host name: nano.ncsa.illinois.edu

Hardware
- SuperMicro SYS-4028GR-TR
- X10DRG-O+-CPU motherboard
- 128 GB DDR4 (8x 16 GB Micron 2133 MHz 36ASF2G72PZ-2G1A2)
- 8 PCI-E 3.0 ports, switched
- Mellanox MT27500 Family [ConnectX-3] QDR IB
- 1x 256 GB Samsung SSD 850

Software
- CentOS 7
- CUDA 8.0/9.1
- PGI 16.10
- Intel ICC 16
- gcc 4.8
- gcc 5.3 via 'scl enable devtoolset-4 bash'

To request access please fill out this form.
Usage notes:
- nano (141.142.204.5) is the head node of the cluster, it should not be used for any computations!
- To connect to the cluster, ssh username@nano.ncsa.illinois.edu
- To get access to a particular node for interactive use, use qsub, e.g.,
  - `qsub -l nodes=nano7:ppn=1:gpus=1,walltime=3600`
- To get entire node 1 for 1 hour for exclusive interactive use:
  - `qsub -l -l nodes=nano1:ppn=12,walltime=3600`
- Better yet, do not allocate nodes for interactive use, instead just submit batch jobs, see for example Job Scripts section at https://kb.iu.edu/d/avmy for details. This is a much better way to share computing resources.
- Interactive jobs are limited to 12 hours maximum walltime per job.
- Batch jobs are limited to 96 hours
- Submit request to staff for longer batch jobs (up to 240 hours)
- To see what's running on the cluster, just run qstat
- This is a shared resource, please keep in mind that other users are using it as well; do not take over the system beyond what you really need.
- Home directory is cross-mounted, but there is very limited storage size
- Run 'df -h /home' to see how much space is available

Current System Status: https://nano.ncsa.illinois.edu:3000/d/3QVrDIFmz/nano-status
