# Nano cluster

## System Description

**Host name:** nano.ncsa.illinois.edu

**Hardware**

- SuperMicro SYS-4028GR-TR
- X10DRG-O+ CPU motherboard
- 128 GB DDR4 (8x 16 GB Micron 2133 MHz 36ASF2G72PZ -2G1A2)
- 8 PCI-E 3.0 ports, switched
- Mellanox MT27500 Family [ConnectX-3] QDR IB
- 1x 256 GB Samsung SSD 850

**Software**

- CentOS 7
- CUDA 9.2/10.0
- PGI 16.10
- Intel ICC 16
- gcc 4.8
- gcc 5.3 via `scl enable devtoolset-4 bash`

---

## To request access please fill out this form.

**Instructions** for running Jupyter Notebooks on compute nodes

**Usage notes:**

- nano (141.142.204.5) is the **head node** of the cluster, it should not be used for any computations!
- to get access to a particular node for **interactive** use, use `qsub`, e.g.,
  - to get one GPU and one CPU core on node 7 for 1 hour for interactive use:
    - `qsub -l nodes=nano7:ppn=1:gpus=1, walltime=3600`
  - to get entire node 1 for 1 hour for exclusive interactive use:
    - `qsub -I -l nodes=nano1:ppn=12, walltime=3600`

- better yet, do not allocate nodes for interactive use, instead just submit batch jobs, see for example `[Job Scripts](https://kb.iu.edu/v/awmy)` for details. This is a much better way to share computing resources.
- interactive jobs are limited to 12 hours maximum walltime per job.
- batch jobs are limited to 96 hours
- submit request to staff for longer batch jobs (up to 240 hours)
- to see what’s running on the cluster, just run `qstat`
- this is a shared resource, please keep in mind that other users are using it as well; do not take over the system beyond what you really need.
- home directory is cross-mounted and accessible from all nodes
- **Current System Status:** [https://nano.ncsa.illinois.edu:3000/d/3QVrDIFmz/nano-status](https://nano.ncsa.illinois.edu:3000/d/3QVrDIFmz/nano-status)

---

## DL frameworks

- TensorFlow 1.10

## Node configuration (see login message for the exact configuration):
