A Focus on Cybersecurity for NSF Science: Trusted CI Receives $12.5m Renewal Grant

The National Science Foundation (NSF) has awarded a $12.5m renewal grant to Trusted CI, the Cybersecurity Center of Excellence (CCoE). The renewal award will fund the Center through 2024. "The dynamic, open, and distributed nature of scientific collaboration introduces unique cybersecurity challenges for scientific cyberinfrastructure," said NCSA's Jim Basney, who serves as deputy director of Trusted CI. "With our focus on cybersecurity for NSF science, Trusted CI provides leadership and guidance that addresses these unique challenges."

More details about Trusted CI, and its goals for the next five years, are available in the NCSA press release.
