Documentation

User Guide

These user guides should provide a quick overview of the web mapping component's controls, tutorials that guide the user through examples that demonstrate the web client's functionality, etc. As the project progresses, more examples will be added to demonstrate the capabilities that are defined in each Task that involves building upon the web client's functionality.

User Interface

A quick guide through the web mapping components user interface.

User Interface Controls Guide

Tutorials

These tutorials demonstrate the web mapping components UI functionality with examples and screenshots displaying expected behavior. These guides should help users become familiar with using the web mapping component.

How to display census tracts and business locations

Developer Guide

These guides should assist developers that want to set up a development environment to extend the web mapping components functionality as well as the server side functionality.

Setup

How to setup each environment required to build or deploy the web mapping component.

Setup Spatial Database
Setup Geoserver - WFS
Setup Development Environment
Setup Build Environment
Setup Deployment Environment
Setup PostgreSQL and PostGIS
Parameter Schema
