

InCommon CAMP Week 2021

NCSA's [CILogon](#) team will be participating in [InCommon CAMP Week](#) October 4-8, 2021. The meeting will gather the identity and access management (IAM) community to discuss the latest advancements in federated authentication, identity assurance, supporting NSF and NIH researchers, and many other IAM topics. NCSA's Jim Basney will be representing the CILogon project on the closing plenary panel about "Strategies to Enable Federated Access to SAML-shy Resources and Services" on Tuesday, October 5 at 1pm CDT.

The [CAMP program](#) will also include presentations from other IAM experts from the University of Illinois, including Eric Coleman, Tracy Tolliver, and Keith Wessel, covering topics such as "Library Access of the Future", "A story of collaboration to help protect campuses from COVID-19" (using the Safer Illinois app), "Linking multiple SSO Systems for a Better User Experience", and "Splunk and Advanced Log Analysis".
