Requirements to Use Cases

Requirements generated from Advisory Panel

General

- very low barrier
- provides functionality beyond what currently exists
- adaptable to many different possible workflows
- user can enter in at any stage of workflow
- owner of the data is in control of access and visibility

Collaboration

- support versioning
- support tracking (history, metadata as it evolves)
- support supplemental artifacts representing discussion, comments, review
- tracking contributions (who, when items added); simple provenance
