

# MPI installation

## OpenMPI

is already installed on it

## MVAPICH2

Get MPI distro from <http://mvapich.cse.ohio-state.edu/downloads/>

```
wget http://mvapich.cse.ohio-state.edu/download/mvapich/mv2/mvapich2-2.1.tar.gz  
tar -xvf mvapich2-2.1.tar.gz
```

put this into /usr/include/asm/timex.h - no need actually

```
#ifndef __ARCH_ARMV7L_H  
#define __ARCH_ARMV7L_H  
#ifdef __cplusplus  
extern "C" {  
#endif  
#define mb()     asm volatile("dmb": :"memory")  
#include <stdlib.h>  
#include <sys/time.h>  
typedef unsigned long long cycles_t;  
static inline cycles_t get_cycles (void)  
{  
    cycles_t thetime;  
    struct timeval tv;  
    if (gettimeofday(&tv, NULL) != 0)  
        return 0;  
    thetime = ((cycles_t)tv.tv_sec) * 1000000ULL + ((cycles_t)tv.tv_usec);  
    return (cycles_t)thetime;  
}  
#ifdef __cplusplus  
}  
#endif  
#endif /* __ARCH_ARMV7L_H */
```

configure and deploy on the head node

```
sudo apt-get install byacc  
cd mvapich2-2.1  
.configure --enable-fast=all,O3 --enable-shared --enable-threads=multiple --enable-cuda=basic --disable-  
fortran --disable-mcast --with-cuda=/usr/local/cuda --with-device=ch3:nemesis --enable-timer-type=clock_gettime  
#gettimeofday  
make  
make install
```

## MPI Test
