2016-08-02 Nebula Maintenance

On Tuesday, August 2nd from 10:00am to 12:00pm the Nebula web interface and API interfaces will be unavailable for maintenance.

We will work on:

- Software and security updates
- Upgrade the maximum (and default) for all instances to 8956 instead of 1456
- Replace the nonvc package to address a bug that newer versions of Chrome tickled, making the console very slow
- Test some volume migrations

All actions performed and working as expected.
