Getting Help

Having trouble logging in at idp.ncsa.illinois.edu? It may be a temporary issue. You can try restarting your web browser to see if that fixes the issue. If you continue to experience problems, please contact help+idp@ncsa.illinois.edu and we will respond during business hours.

Having trouble with Duo at NCSA? Please visit https://go.ncsa.illinois.edu/2fa for instructions.

Forgot your NCSA username? Please visit https://identity.ncsa.illinois.edu/recover to recover it.

Forgot your NCSA password? Please visit https://identity.ncsa.illinois.edu/reset to reset it.

Having trouble accessing portal.geni.net? Please contact help@geni.net.

Federated Identities

NCSA operates a SAML identity provider for NCSA users/projects that is registered in the InCommon Federation and available globally via eduGAIN. Choose the "National Center for Supercomputing Applications" identity provider to sign in to sites like https://wiki.shibboleth.net/ with your NCSA identity. For operational announcements about NCSA's identity provider, please subscribe to the ncsa-idp-announce mailing list.

NCSA also operates the CILogon service that provides an OpenID Connect compliant interface to federated identities. CILogon enables you to log on at sites like https://www.globus.org/ using your campus identity. For information on connecting your application with CILogon, visit https://www.cilogon.org/oidc. For operational announcements about CILogon, please see https://cilogon.statuspage.io/.

X.509 Certificates

To obtain an IGTF-compliant user certificate, visit https://cilogon.org/.

To obtain a server certificate, see our page on NCSA Certificate Requests.

See NCSA CA Information for details about the Certification Authorities operated by NCSA.
