

Status Report March 6, 2009

Work Completed

- Wrote sections 3.1.3 and 3.1.9 for the MAE Annual Report
- Write Ch. 4 MAEviz Accomplishments for the MAE Annual Report
- Reviewed and edited the tutorial we'll present at the Laclede Gas / Centerpoint training session
- Opened [MAE-1193](#), a bug report filed by Rama Sivakumar of Georgia Tech. MAEviz cannot create a local repository when logged in as an active domain user. I followed up with him and sent him some diagnostic code to help debug the problem.
- Attended Laclede/Centerpoint tutorial meeting with Tim Gress and Can Unen to discuss the training session that will be in St. Louis in a few weeks
- Fixed MAE-1192. Terry found an old help file that was still being linked to in the main help section of MAEviz.
- Opened [MAE-1194](#). Some of the help files in MAEviz contain analysis names that are out of sync with the latest list of analyses. A few newer /less used analyses need some help associated with them. I started this on Friday and I anticipate finishing it on Monday.

Work Planned

- Work on CSV file ingester to ingest MAEviz tabular data, this work is associated with the Data Catalog view
- Work on the Data Catalog View
- Continue learning eclipse command framework

Comments

This week, a few big writing assignments came up for the MAE Center and that was my main focus for the first half of the week.
